Core Products

4

Main Stacks

End-to-End

SDLC Ownership

CORE STRENGTHS

- REST API design and integration
- Entity modeling, DTO mapping, and migrations
- Large-scale data processing and reporting
- SQL Server, MySQL, and relational design
- Linux deployment, maintenance, and debugging
- Excel import/export and validation workflows

SKILLS

PROFILE

Focused on backend architecture, data-intensive workflows, and shipping stable products through the full SDLC.

EXPERIENCE

Backend Developer

SEP 2024 - PRESENT

BIM MYANMAR · MYANMAR

Developing and maintaining backend services for enterprise systems built with .NET and Entity Framework Core.

- Designed and maintained RESTful APIs, DTO mapping flows, validation rules, and migration pipelines.
- Managed database structures and entity relationships for ticketing, hospital, and CMS use cases.
- Worked across debugging, testing, optimization, and deployment as part of the full development lifecycle.

Software Engineer

FEB 2023 - SEP 2024

MEDICAL ACTION MYANMAR · MYANMAR

Delivered a full-stack patient reporting platform and supported large data workflows in Laravel on Linux-based infrastructure.

- Built frontend and backend features with PHP Laravel, JavaScript, jQuery, and Bootstrap.
- Owned data quality, validation, reporting logic, and secure database operations for patient records.
- Handled performance improvements, bug fixes, Linux deployment tasks, and feature iteration with stakeholders.

Software Developer Trainee

MAY 2022 - AUG 2022

Maintenance and Testing

EDUCATION

Bachelor's Degree (AIERP)

University of Computer Studies, Yangon

GRADUATED DATE: JANUARY 2025

BIB CO., LTD · MYANMAR

Contributed to both product and marketing web experiences during on-the-job training.

- Built JobHub features with Java, Spring MVC, Spring Security, MySQL, HTML, CSS, and Bootstrap.
- Implemented search and secure upload flows with role-based access for job seekers, companies, and administrators.
- Delivered responsive frontend work for a cosmetic web page with HTML, CSS, and jQuery.

SELECTED PROJECTS

.NET / EF CORE

Ticket Announce Management System

BACKEND DEVELOPER

Built secure backend modules for ticket processing and announcement management with strong attention to data integrity and maintainability.

REST APIs

DTO Mapping

Migrations

Validation

.NET / EF CORE

Hospital Management System

BACKEND DEVELOPER

Implemented backend capabilities for patient management, medical records, billing, and reporting while maintaining consistency across complex entities.

Reporting

Relational Design

API Integration

Optimization

PHP / LARAVEL

Headless CMS Website

FULL-STACK DEVELOPER

Developed content-driven product features across backend and frontend, supporting administration and publishing workflows.

Laravel

Admin Workflows

Full Stack

Maintenance

PHP / LARAVEL

Patient Reporting Data Management System

SOFTWARE ENGINEER

Delivered a comprehensive reporting platform with secure validation, large dataset handling, and production support in Linux environments.

- Patient Data
- Excel Flows
- Linux
- Performance

JAVA / SPRING MVC / MYSQL

JobHub

SOFTWARE DEVELOPER

Created search-driven job marketplace features and secure company upload flows with role-based administration.

- Spring Security
- Search
- Role Access
- Bootstrap
