

.NET developer with 3+ years of professional and hands-on experience building and maintaining backend systems, REST APIs, CMS workflows, and data-intensive business products. Strong in C#, ASP.NET Core, Entity Framework Core, SQL Server, and AWS serverless services, with end-to-end experience spanning design, implementation, deployment, optimization, and production support.

PROFESSIONAL EXPERIENCE

Backend Developer · BIM Myanmar

September 2024 — Present

Build and maintain backend systems for enterprise products using C#, ASP.NET Core, and Entity Framework Core.

- Design and implement RESTful APIs, DTO mapping flows, validation rules, and database migrations.
- Model complex SQL Server relationships for ticketing, hospital, and content-management workflows.
- Contribute to debugging, testing, performance optimization, deployment, and production support.

Software Engineer · Medical Action Myanmar

February 2023 — September 2024

Delivered a full-stack patient reporting platform and supported high-volume data workflows on Linux infrastructure.

- Built frontend and backend features with PHP, Laravel, JavaScript, jQuery, and Bootstrap.
- Owned data validation, reporting logic, and secure database operations for sensitive patient records.
- Improved performance, resolved production issues, managed deployments, and iterated with stakeholders.

Software Developer Trainee · BIB Co., Ltd

May 2022 — August 2022

- Built JobHub features using Java, Spring MVC, Spring Security, MySQL, and Bootstrap.
- Implemented search, secure uploads, and role-based access for job seekers, companies, and administrators.

CORE EXPERTISE

C# ASP.NET Core
REST APIs EF Core
SQL Server CMS
AWS Lambda Amazon S3

STRENGTHS

Backend Engineering

API design, validation, relational modeling, migrations

Cloud & Operations

Serverless workflows, Linux, Docker, deployment, support

Delivery

Ownership, debugging, problem-solving, collaboration

EDUCATION

Bachelor's Degree (AIERP)

University of Computer Studies, Yangon

Graduated January 2025

Selected Projects

Backend, cloud, healthcare, and enterprise systems

Ye Naing
Software Engineer

CLOUD AUTOMATION

Serverless S3 Processing Pipeline

Designed an event-driven AWS workflow that invokes Lambda functions when files are uploaded to Amazon S3, automating processing through a scalable, serverless architecture.

AWS Lambda · Amazon S3 · Event-Driven Architecture · Serverless

ENTERPRISE PLATFORM

Ticket Announce Management

Developed secure backend modules for ticket processing and announcement management, with maintainable APIs and dependable data integrity.

C# · ASP.NET Core · EF Core · REST APIs

HEALTHCARE OPERATIONS

Hospital Management System

Built backend capabilities for patient management, medical records, billing, and reporting across complex relational entities.

ASP.NET Core · SQL Server · Reporting · Optimization

CONTENT PLATFORM

Headless CMS Website

Delivered content-driven full-stack features supporting administration, publishing workflows, and reliable product maintenance.

PHP · Laravel · Admin Workflows · Full Stack

DATA-INTENSIVE HEALTHCARE

Patient Reporting System

Built a reporting platform with secure validation, large-dataset handling, Excel workflows, and production support.

Laravel · MySQL · Linux · Data Validation

JOB MARKETPLACE

JobHub

Implemented search-driven marketplace features, secure company uploads, and role-based administration for three user types.

Java · Spring MVC · MySQL · Spring Security

PROJECT IMPACT

These projects demonstrate practical ownership across cloud automation, API development, relational data modeling, secure workflows, reporting, deployment, and production support. Client and employer source code remains private.

Skills & Credentials

A practical toolkit for reliable product delivery

Ye Naing
Software Engineer

TECHNICAL SKILLS

Backend

C#, .NET, ASP.NET Core, Entity Framework Core, REST APIs, Swagger / OpenAPI, PHP, Laravel, Go, Java

Frontend

JavaScript, HTML, CSS, jQuery, Bootstrap, Razor

Databases

SQL Server 2019, MySQL, relational database design, migrations, data validation, Excel data pipelines

Cloud & Platform

AWS Lambda, Amazon S3, event-driven architecture, serverless workflows, Linux Ubuntu, Docker, LAMP stack, deployment, production support

Engineering Tools

Git, Postman, OpenAPI, debugging, testing, database migrations

Professional Skills

End-to-end ownership, analytical problem-solving, stakeholder collaboration, data quality, continuous learning

CERTIFICATIONS

Relational Database

freeCodeCamp · Developer
Certification

Verified Technical Credential

Skilljar · Verified Certificate

CAREER HIGHLIGHT

Progressed from trainee to backend developer while contributing to six products across cloud automation, healthcare, enterprise operations, content, and recruitment.

CAREER OBJECTIVE

Contribute as a .NET developer building and maintaining dependable backend systems, APIs, and CMS products in a collaborative remote team.

AVAILABILITY

Open to backend and full-stack software engineering opportunities, including hybrid and remote roles.
